

DALTONDOCK™ EDGE OF DOCK LEVELER

DURABILITY

- Rugged construction of lip and deck hinge provides durability for years of service
- Lip hinge sheds debris minimizing trapping and grinding between the lip deck junction causing premature wear
- Textured powder coat finish provides better traction for safety and helps to increase productivity. This durable finish also provides better adhesion and corrosion protection compared to traditional paint methods

SMOOTH TRANSITION PATH FROM BUILDING TO TRUCK

- Designed to minimize dock shock and limit damage to cargo and material handling equipment
- Reduces impact to workers
- Facilitates fast movement of forklifts and material handling equipment

EASY AND SAFE DEPLOYMENT

- Easy to use push/pull handle for comfortable and fast operation
- The handle creates an ergonomically correct position for the operator

ENVIRONMENTALLY FRIENDLY

Compared to paint, our powder coat process has major environmental advantages (reduces V.O.C.).

One Year Limited Warranty; Two Year Limited Warranty when Wayne Dalton door and Edge of Dock Leveler purchased together.

Smooth path for quick loading and safety

- Smooth path allows forklifts to move quickly over the leveler minimizing dock shock
- Optimized lip level provides a smooth transition from the leveler to the trailer
- Handle is quick and easy for workers to push/pull and is integral so it never gets lost
- Handle range of motion keeps workers in a comfortable position
- Proprietary powder coat formulation is textured to provide enhanced traction and non-slip protection.
- If the trailer suddenly pulls away, the edge of dock automatically returns to stored position to prevent hazardous conditions

Bumper	Standard	Optional
Molded bumpers	✓	
Bumper boxes	✓	
Lip*		
15" Lip	✓	
17" Lip		✓
Lip bevel	✓	
Textured Finishes		
Gray powder coat	✓	

* The lip will have the regular crown unless the mid or high crown version is selected in the ordering process. Your sales representative can advise you further on lip crown selection.

Serviceability and installation

- Field serviceable with easy accessibility to adjusters for main spring and kicker bar
- Serviceable lip and hinge pin can be removed without breaking welds.
- Service brace is easy to reach and engage and is integral so it never gets lost
- Grease fittings to lubricate deck hinge for smooth operation

Powder coat process has major environmental advantages.

- Our powder coat process has minimal Volatile Organic Compounds (VOCs) and solvents
- Overspray is recycled which reduces waste disposal issues compared to a paint process
- The US Environmental Protection Agency (EPA) recommends powder coatings as a sustainable coating option

Operation	Standard	Optional
Auto return to store	✓	
Self storing handle	✓	
Service brace	✓	
Safety tread on deck and lip	✓	
Working range 3" above/ below dock	✓	
Effective range 5" below dock	✓	

Durability, low maintenance, low downtime

- Heavy duty Multi-Lug construction sheds debris instead of trapping/grinding it between the lip/deck junction and causing fatigue and maintenance issues
- Factory-applied powder coat for better durability and corrosion resistance compared to paint
- Compliant with ANSI MH30.1 - 2022 which includes rigorous load testing requirements

Model	Size	Capacity
E66WD	66"	20,000 lbs or 30,000 lbs
E72WD	72"	20,000 lbs or 30,000 lbs

Proprietary textured powder coat finish
