FOR IMMEDIATE RELEASE

WAYNE-DALTON EXPANDS 8000 MODEL GARAGE DOOR SERIES FOR WEST COAST CONSUMERS TO INCLUDE SONOMA DESIGN

Lewisville, Texas (June 14, 2012) – Known for offering a wide selection of garage door designs and styles, Wayne-Dalton is pleased to announce the addition of the Sonoma design to the 8000 and 8100 model residential steel garage doors for West Coast customers. Wayne-Dalton added the popular design to this model series as part of the company's plan to continue to expand its product line by offering more design options to its entry level doors.

A garage door with a Sonoma design has the traditional square paneling but with additional grooves carved within each square panel. The additional grooves provide a stylish appearance to what would be considered a standard door design.

“By making the Sonoma design available on the Models 8000 and 8100 for West Coast consumers, Wayne-Dalton dealers will have the competitive advantage of offering this prevalent design at an affordable price,” said Daniel Christian, Wayne-Dalton Residential Steel Product Manager. “The Sonoma design is also available on the Models 8300, 8500, 9100 and 9600, which feature polyurethane insulation.”

Wayne-Dalton plans to expand the Models 8000 and 8100 Sonoma design beyond the West Coast in the near future.

The Wayne-Dalton Models 8000 and 8100 are entry level steel garage doors. The Model 8000 is non-insulated, single-layer steel door while the 8100 Model features polystyrene insulation. Each door is offered in a variety of colors, designs, and optional decorative windows.

The doors are also available with TorqueMaster®, Wayne-Dalton's exclusive counterbalance system that safely and cleanly contains door counterbalance springs inside a steel tube to help prevent injury from an accidental release of tension.

For more information on the 8000 series Sonoma design and Wayne-Dalton's full line of residential garage door options visit <http://www.wayne-dalton.com/residential-garage-doors>.

About Wayne-Dalton

Wayne-Dalton, a division of Overhead Door Corporation, is a world-class leader that has designed and manufactured residential and commercial garage doors for over 50 years. For dealers, the company is known as a proactive business partner that prides itself on providing a wide variety of easy-to-install innovative products and smart sales tools that help them grow their business. At the same time, Wayne-Dalton simplifies the purchase process by providing a full range of door options and styles through conveniently located dealers. Nine manufacturing facilities, over 70 Sales Centers, and over 2,000 independent dealers, both domestic and international, ensure unmatched distribution.
