FOR IMMEDIATE RELEASE

WAYNE DALTON INTRODUCES NEW MODEL IN THE CARRIAGE HOUSE STEEL COLLECTION

Model 9405 Carriage House Garage Door Will Feature New Design and Expanded Color Options

LEWISVILLE, Texas (MARCH 30, 2015) – Wayne Dalton, one of America’s most well-known garage door brands, recently announced the latest addition to its industry-leading Carriage House Steel Collection of garage doors, the Model 9405 Carriage House door.

Homeowners now have another option to enhance the look of their home when upgrading or remodeling their garage door. The Carriage House Steel Collection features doors designed to showcase the look and feel of old-world charm with modern day materials. The Model 9405 Carriage House door comes with a painted, galvanized steel backer, adding strength to the door and helping prevent thermal cupping in extreme weather.

“Homeowners looking to replace or upgrade their garage door will love the added protection and value of the steel backer with the look of our popular Carriage House collection,” said Mark Sawicki, residential product manager for Wayne Dalton. “The Model 9405 is also an excellent option for builders, as the galvanized steel backing provides extra protection during the construction process.”

For homeowners or builders looking to make an impact on a home’s curb appeal, the Model 9405 Carriage House garage door will have expanded color options as well, including stained and two-toned paint finishes. Partnering the new design with a variety of window and decorative hardware options creates a custom look specific to homeowners’ tastes and styles. The new Model 9405 will replace the Model 9400.
