## **Wayne Dalton Adds New Finishes and Wood Grain Options to Model 9510 Designer Steel Garage Door**

*Red Walnut and Weathered Gray finishes for all panel options are now available*

**July 30, 2020** - Wayne Dalton, a leading manufacturer of residential and commercial door solutions, has introduced new wood grain finishes for its Model 9510 Designer Steel garage door collection. These new options include single directional wood grain finish in Red Walnut or Weathered Gray for all panel options. The new design choices now provide homeowners with even more customization, allowing customers to choose the best match for the aesthetic and design for their home.

“Our Designer Steel collection is one of our most striking, yet durable models of Wayne Dalton garage doors,” said Wayne Dalton Residential Product Manager Moses Colunga. “We wanted to produce design choices that appeal to customers who are seeking to enhance their curb appeal without the maintenance real wood requires. The classic style of the Red Walnut and Weathered Gray finishes will complement a variety of homes for a long time to come.”

Model 9510 Designer Steel is pinch-resistant to help prevent finger injuries while the door is closing. It also features TorqueMaster<sup>®</sup> Plus, Wayne Dalton’s exclusive counterbalance system that safely and cleanly contains the door’s springs inside a steel tube. These doors come with foamed-in-place polyurethane insulation with an R-value of 12\*, which can help reduce street noise and make the door operate more quietly.

Wayne Dalton Model 9510 is offered in both a Vicksburg and Ridgefield panel design and features a variety of color options. In addition to its new wood grain finishes, homeowners have the option to choose from four standard colors — White, Almond, Sandstone and Brown —

or four premium paint finishes — Desert Tan, Terra Bronze, Gray and Black. Model 9510 Designer Steel doors can also be customized to closely match any idea imaginable with the Wayne Dalton® TruChoice® Color System that offers more than 6,000 color choices on a variety of doors and styles.

\*Wayne Dalton uses a calculated door section R-value for our insulated doors.
