Wayne Dalton Continues To Strengthen Commitment to Providing Best-In-Class Solutions and Services at the Fall 2022 International Door Association EduCon and Tradeshow

The annual education event offers industry professionals an exclusive opportunity to collaborate, network and receive tools to elevate their business

October 25, 2022 - Wayne Dalton®, a leading manufacturer of residential and commercial door solutions, is an exhibitor at the second annual Fall International Door Association (IDA) EduCon and Tradeshow. In an effort to build upon IDA’s mission of being the leading trade association representing the door and access systems industry, the EduCon and Tradeshow provides like-minded door professionals with an opportunity to engage and access real business solutions.

“This year’s EduCon and Tradeshow offers our team the chance to network, be updated on the latest products and services available to business owners in the industry and support the IDA,” Wayne Dalton Brand Manager Alexandria Ligorotis said. “With a shared vision to attain a high level of product and installation quality, it’s meaningful events like the tech education programs at IDA that enable us to serve the garage door sector more effectively.”

Throughout the tradeshow, Wayne Dalton professionals will be participating in workshops and discussions with fellow vendors, dealers and technicians about ways to drive productivity and success.

WAYNE DALTON PRODUCTS TO BE HIGHLIGHTED

Carriage House Steel Model 9405

Wayne Dalton's Carriage House Steel Model 9405 is versatile and low-maintenance, offering a variety of carriage house designs, large windows and a wide range of custom colors and stain options. These carriage house garage doors offer embossed, high-tensile steel panels that give the look of wood with the strength of steel. Model 9405 comes with foamed-in-place

polyurethane insulation with an R-value of 10*, which can improve a home's thermal efficiency, block street noise and make the door operate more quietly. This door also offers wind load options, pinch-resistant panels and the TorqueMaster® Plus, Wayne Dalton's exclusive counterbalance system that safely contains springs inside a steel tube.

Classic Steel Model 9100

The Classic Steel Model 9100 garage door is trusted by builders as a timeless, high-quality door. Model 9100 has consistently remained at the forefront of Wayne Dalton's best sellers due to its extended insulation value when compared to non-insulated or polystyrene insulated doors but at a similar price point. Model 9100 offers an insulated R-value* of 9 through three layer-construction made with steel, polyurethane and Wayne Dalton's ToughGard® backer. Five classic and contemporary panel designs are also available for these doors, along with a wide range of window and finish options.

This year's EduCon and Tradeshow event will be hosted in New Orleans, Louisiana, Oct. 27-29. For more information, visit: <https://doors.org/idaexpo-events/educon>.

**Wayne Dalton uses a calculated door section R-value for our insulated doors.*
