Wayne Dalton's Best-Selling Classic Steel Garage Doors Now Available in Bold Black Finish

Elevating home exteriors with a durable, trend-forward finish option

November 6, 2024 - Wayne Dalton, a leading manufacturer of residential and commercial dock & door solutions, has introduced a striking new black color option for its most popular Classic Steel Models 9100 and 9605. This new black finish brings modern sophistication to any home exterior, from contemporary architecture to traditional designs, without compromising the trusted quality that defines Wayne Dalton's best-selling garage doors.

"Our Classic Steel Models are the #1 choice among builders, and now they're available in the industry's most sought-after color," said Chris Williams, Wayne Dalton® Product Manager. "With this new black finish, we're not only providing a bold, stylish upgrade but are also ensuring that the durability, thermal efficiency and safety our customers expect are built into every door."

The new black finish is backed by the company's exclusive Cool Chemistry® paint technology, designed to resist fading and protect against the thermal expansion that can occur with dark-colored finishes. Engineered to retain its rich color and gloss even under intense sun exposure, Cool Chemistry® ensures that homeowners can enjoy the bold beauty of black without sacrificing performance.

Beyond its stylish appearance, each door features resilient three-layer construction, foamed-in-place polyurethane insulation and a U-factor of .26 to help improve thermal efficiency

and reduce noise. Model 9100 offers a ToughGard® backer, while Model 9605 provides additional reinforcement with a steel backer, making both doors a durable, low-maintenance option that stands the test of time. The doors also feature the TorqueMaster® Plus Counterbalance System, an enclosed design that safely contains springs within a steel tube to prevent accidental release. The optional 25,000-cycle spring upgrade offers twice the lifespan of a standard torsion spring, delivering additional peace of mind and value.
