## **Wayne Dalton Makes Big Waves Within the Highly-Esteemed International Door Association**

*Wayne Dalton solidifies itself as a Total Solutions Provider at the leading garage door association's Expo+ and Product Innovation & Showcase Awards*

**July 26, 2024** - Wayne Dalton, a leading manufacturer of residential and commercial dock & door solutions, has firmly established itself within the International Door Association (IDA), a leader in the garage door and access systems industry that has earned respect from professionals worldwide. The company first captivated attendees of the 2024 Spring IDA Expo+ in April with an impressive array of innovative products, including the digitally-printed Wood Grain Impressions™ Finish Collection and the newly-announced DaltonDock™ Equipment line. Continuing this momentum, Wayne Dalton has been recognized in the 2024 IDA Product Innovation & Showcase Awards, further solidifying its industry-leading position.

“Our dual achievements at the IDA Expo+ and the Innovation & Showcase Awards highlight our unwavering commitment to pushing the boundaries of innovation in the garage door industry. By continuing to introduce groundbreaking products, we hope to remain the go-to source for dock and door solutions that integrate style, ease-of-use and durability,” Wayne Dalton® Brand Manager Alexandria Ligorotis said.

At the IDA Expo+, Wayne Dalton's innovative solutions were on full display, featuring options for a variety of home styles and business applications. From sleek modern, traditional, and carriage house residential garage doors that boost curb appeal to robust high-speed and high-performance commercial doors engineered for reliability and productivity, Wayne Dalton covered all bases. The company also introduced new light and air curtain options to its high-speed commercial door models, offering enhanced safety benefits. In addition to spotlighting a wide

range of products designed to meet both residential and commercial needs, the company showcased its partnership with [OHDParts](#) and [The Genie Company](#), strengthening its ability to offer a comprehensive experience for dealers, homeowners and business owners.

Honored in the Product Innovation & Showcase Awards by the IDA for setting a new standard in loading dock solutions, DaltonDock™ stands out with its superior build and user-centric design. This line includes the Mechanical Pit Leveler and Edge of Dock, as well as various Seals, Shelters and accessories, all of which can be paired with a Wayne Dalton door, creating a one-stop shop for loading dock applications. The Mechanical Pit Leveler offers smooth building-to-truck transitions and innovative pit height adjusters, while the Edge of Dock leveler features easy installation and ergonomic design. Both levelers comply with stringent ANSI MH 30.1 specifications and have a textured powder coat for superior traction and corrosion resistance. Lastly, the Seals and Shelters, made from fire-retardant foam and UV-resistant fabrics, enhance protection against harsh weather, improving working conditions and reducing energy costs.

The Wood Grain Impressions™ Plank Finish Collection on Classic Steel Models 8300/8300AG was also featured in the award showcase and Expo+. Standing out with its state-of-the-art digital printing technology, this collection brilliantly combines the beauty of wood with the resilience of steel. The high-resolution digital technology used offers four unique designs with realistic, non-repeating wood grain patterns, enhancing homes' visual appeal without having to compromise on durability or low maintenance. Additionally, more bi-directional designs are set to be released soon and were showcased at the show, providing even more options for homeowners to choose from.
