

CONTEMPORARY ALUMINUM

*Clear anodized finish, Impact Frosted Polycarbonate glass*

DOOR FEATURES

**Contemporary styling and wind load protection** in a modern aluminum full view door.

**Built to meet local building codes** including Florida Building Code, Static and Impact approvals.

**Impact rated options to 18' 2" wide** to meet wide range of applications.

**Wind load design** pressure options to +50.0/-50.0 with impact to help protect in severe weather events.

**Polycarbonate glazing options** for impact designs include clear, frosted and scratch resistant.

**Wide variety of powder coat finish colors** to deliver you aesthetic preference.

**Reinforcement struts** do not interfere with the vision panels, providing a clean look and a wide area of unobstructed view.

**Model 8855 with insulated glass** carries a tested U-factor\*  of 0.30; with Low E insulated glass the U-factor is 0.28.

\*U-factor is independently tested and verified per ANSI/DASMA 105 using doors with full glazing and specific product sizes.

\*\*Wayne Dalton uses a calculated door section R-value for our insulated doors.

## 1 Style

- Wide, heavy-duty rails and stiles
- An array of frame finishes and special custom options
- Door sizes up to 20'2" wide by 20'1" high\*
- Impact rating on doors up to 18'2" wide
- Joint seal between sections for additional weather-resistance
- Optional polyurethane insulation for rails and stiles up to 18'2" wide

\*Section height varies dependent on door height.

## 2 Choose Your Color

### Anodized Finishes

Clear (Standard)

Light Bronze

Medium Bronze

Upload a photo of your home, experiment with panel designs, colors, window styles, and decorative hardware, and visualize the transformation. Try it today by scanning the QR code or visiting [wayne-dalton.com](http://wayne-dalton.com)—your journey to enhanced curb appeal starts with just a click!

## THERMAL PERFORMANCE

Wayne Dalton participates in the DASMA Thermal Performance Verification Program. The program verifies the thermal performance of sectional garage doors. The lower the U-factor rating, the better the thermal performance.

Symbol indicates verified U-factor rating in accordance with the DASMA Thermal Performance Verification Program.
