Doors with the WindSafe® logo comply with requirements of one or more approval agencies, including: the Florida Building Code, Texas Department of Insurance and Miami-Dade County (FL).

Doors with the Impact logo have been rated for impact resistance.

Wayne Dalton participates in the DASMA Thermal Performance Verification Program. The program verifies the thermal performance of sectional garage doors. The lower the U-factor rating, the better the thermal performance.

Symbol indicates verified U-factor rating in accordance with the DASMA Thermal Performance Verification Program.

U-factor is independently tested and verified per ANSI/DASMA 105 using solid doors and specific product sizes.

Wayne Dalton uses a calculated door section R-value for our insulated doors.

Safety. Style. Performance.

Model 8800, Black anodized aluminum, White Laminated privacy glass

The right garage door has a great impact on the curb appeal of your home. Wayne Dalton offers a wide selection of designs, colors, materials, windows and accessories that best compliment your home.

Transform your home with unlimited possibilities. Use this product catalog to see an overview of our residential product offering. It is divided by categories that define the construction and materials of the door with each category walking you through the 3-step designing process.

SPECIALTY VINYL

Engineered to be maintenance-free and provide an elegant look that will last a lifetime. These doors won't rust, fade, crack or dent and are great for coastal areas with lots of moisture and wind wear.

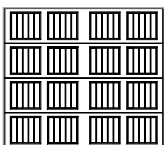

- Model 8700 comes in two panel designs that offer the timeless design of freshly painted hardwood
- This door has full PVC color construction. This means scratches will never show because the color goes all the way through the material
- The UV-Resin used in the door's construction contains special polymers that protect the door sections from the sun's harmful ultraviolet rays
- Polyurethane insulation is permanently bonded to the vinyl skin for U-factor  of 0.24 and an R-value of 11.75
- Twin 20-gauge steel C-channels run full length of each panel and are anchored to interior steel stiles for strength

PERFORMANCE AND SAFETY

Door panels are engineered with a pinch-resistant design to prevent finger injuries while the door is closing. Available on Models 9100, 9405 and 9605.

The TorqueMaster® Plus counterbalance contains springs safely inside a steel tube to prevent accidental release of tension that could cause injury. Subject to size limitations. Available on Models 8000, 9100, 9405, 8310, 9605, 8670 and 8680.

Models 9100 and 9605 feature horizontal integral struts at the top and bottom of door sections which adds rigidity and strength for long life and smooth operation.

SilentGlide™ rollers have nylon wheels and solid steel shafts to provide years of smooth, quiet, dependable service. Available on all Classic Steel models and Carriage House Steel Model 8670.

The bulb-shaped bottom seal remains flexible even in extreme cold to help keep the bad weather outside.

Features not available on all models. See dealer for details.

**Wayne Dalton uses a calculated door section R-value for our insulated doors.

HOW TO MEASURE FOR YOUR WAYNE DALTON GARAGE DOOR

- A - Exact finished opening width
- B - Exact finished opening height
- C - Side room – distance from the edge of the door opening to any wall or obstruction
- D - Headroom – distance from the top of the finished door opening to the ceiling or underside of joists
- E - Room depth – distance from the finished door opening to the back point where hardware or the opener will extend

Model 8680, Sonoma panel, Walnut finish, 16 window square, decorative hardware

Garage Door Openers

Wayne Dalton and Genie are committed to offering products that provide safety, security and convenience to our customers.

The Genie Company is one of America's most recognized brands, with over 65 years of experience making garage door openers the best they can be for millions of homeowners.

Most recently, Genie has been recognized for openers that combine smart phone application with the opener itself, connecting you to your garage in ways you could never before imagine.

The Genie® Aladdin Connect® system gives homeowners remote access to monitor and control their garage door from anywhere their smart device allows. Controlled through the free app available on Google Play or Apple App Store®, this technology is available as an integrated feature in certain Genie garage door openers or as an external kit.

With a wide variety of openers and options, there's a Genie opener for every Wayne Dalton garage door.
